

eboard

multi-use non-combustible panel

EBOARD

A multi-use non-combustible panel that can be used in multiple areas of the construction process, from cladding applications, impact resistance projects, through to eaves, underlays or as a fire rated system. Eboard can be finished in many ways, with the correct application of render, paint or tiles, depending on your preferred finish.

CBMA - SMARTER BUILDING SOLUTIONS

APPLICATIONS

- Cladding
- Balcony's
- Eaves
- High Impact Areas
- Townhouses / Renovations
- Fire Resistance Projects

BENEFITS

- Non Combustible (1530.1)
- Impact resistant
- Moisture resistant
- Easy to cut and drill
- Environmentally Friendly

MULTI-USE PANEL

CBMA's Eboard is a multi-use panel that has been designed to be used in many applications. With its strong composition and ease of handling, Eboard is a cost effective alternative to traditional panels in the same market.

Eboard has been designed to ensure ease of use, with no hazardous products and being able to cut it with a standard saw blade, saving time and money.

TESTED

Eboard has been tested by NATA approved laboratories for combustibility, Fire Resistance*, Weatherproofing* and Wind loading*.
